# Dashboard & Story Documentation

## ToyCraft Tales: Tableau's Vision into Toy Manufacturer Data

## Introduction

This document presents the Tableau Dashboard and Story developed for analyzing the Toy Manufacturer dataset. The dashboard visually explains state-wise manufacturer distribution, year-wise trends, index-based comparison, and percentage contribution across US states.

## Tableau Public Links

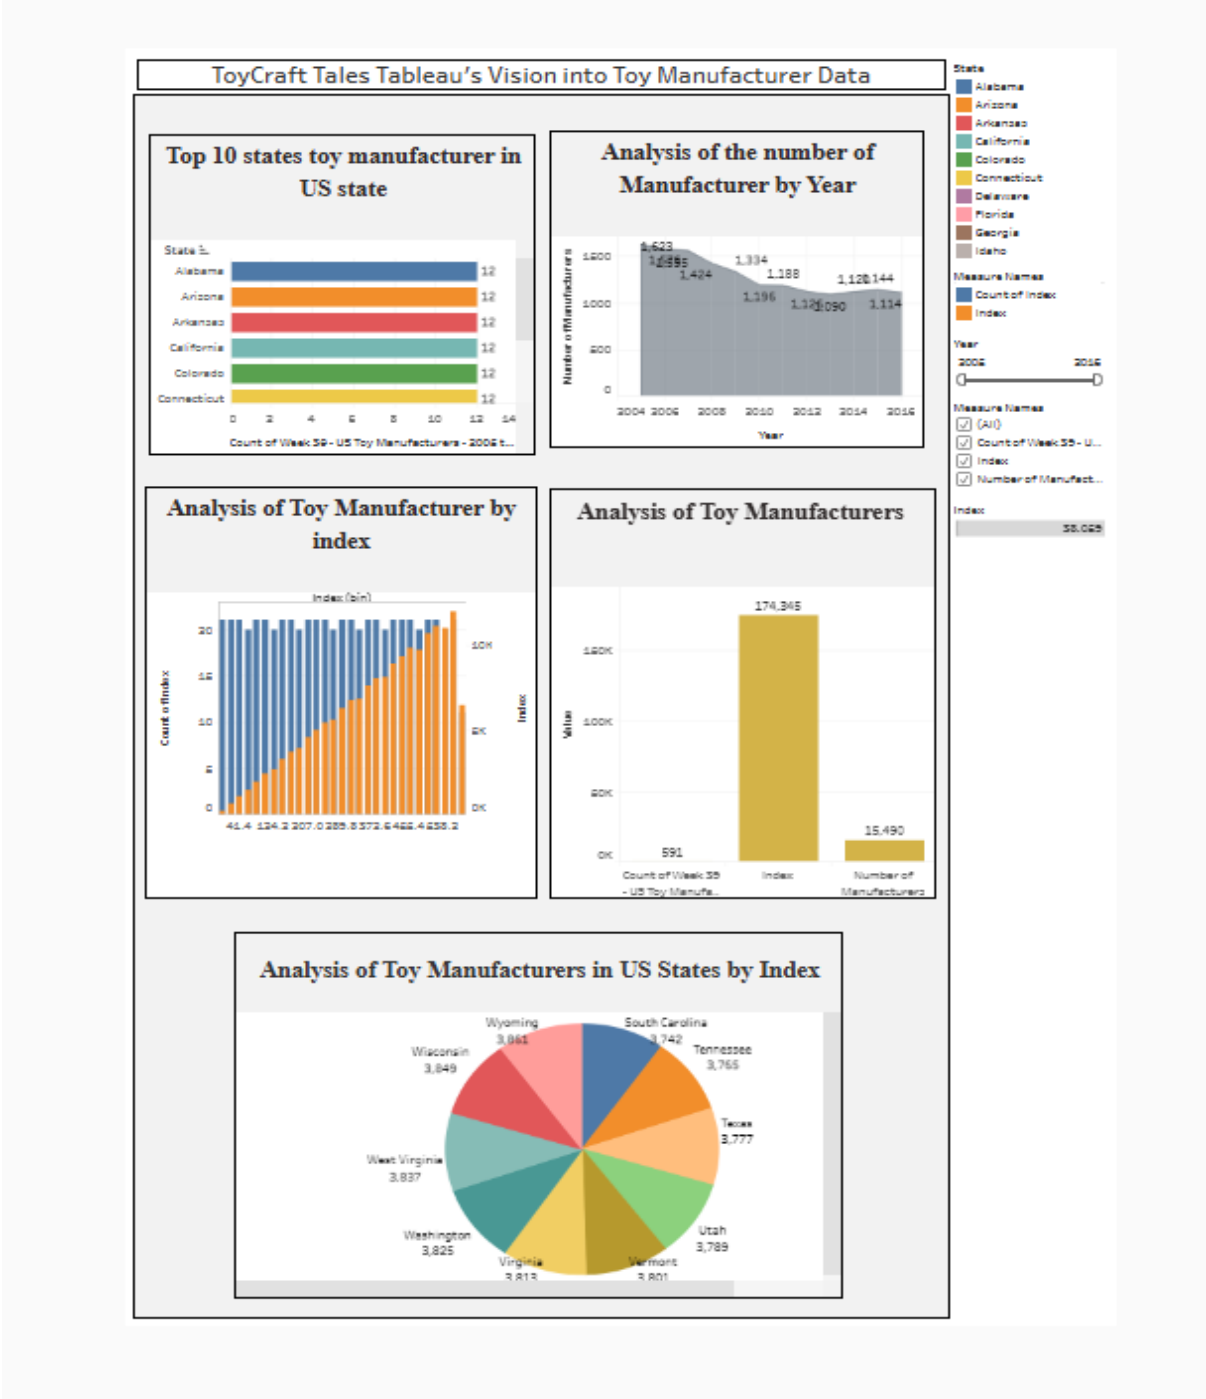
## Dashboard Overview

The dashboard contains 5 major visualizations:

1. Top 10 States by Toy Manufacturers
2. Analysis of Number of Manufacturers by Year
3. Analysis of Toy Manufacturers by Index
4. Analysis of Toy Manufacturers (Overall Comparison)
5. Analysis of Toy Manufacturers in US States by Index



## Detailed Visualization Explanation

### 1 Top 10 States by Toy Manufacturers in US

Visualization Type: Horizontal Bar Chart

Purpose:

- Identify the leading states in toy manufacturing.
- Compare manufacturer count among top states.

Insight:
Few states dominate toy manufacturing compared to others.

## 2 Analysis of Number of Manufacturers by Year

Visualization Type: Line Chart

Purpose:

- Analyze yearly trend of toy manufacturers.
- Identify growth or decline over time.

Insight:
The trend line shows fluctuation in manufacturer count across years.

## 3 Analysis of Toy Manufacturers by Index

Visualization Type: Dual Axis Bar Chart

Purpose:

- Compare manufacturer count with index values.
- Understand performance concentration.

Insight:
Higher index values generally correspond to stronger manufacturing presence

## 4 Analysis of Toy Manufacturers

Visualization Type: Vertical Bar Chart

Purpose:

- Provide overall comparison of manufacturer data.
- Show aggregated values clearly.

Insight:
Highlights total distribution and performance comparison.

## 5 Analysis of Toy Manufacturers in US States by Index

Visualization Type: Pie Chart

Purpose:

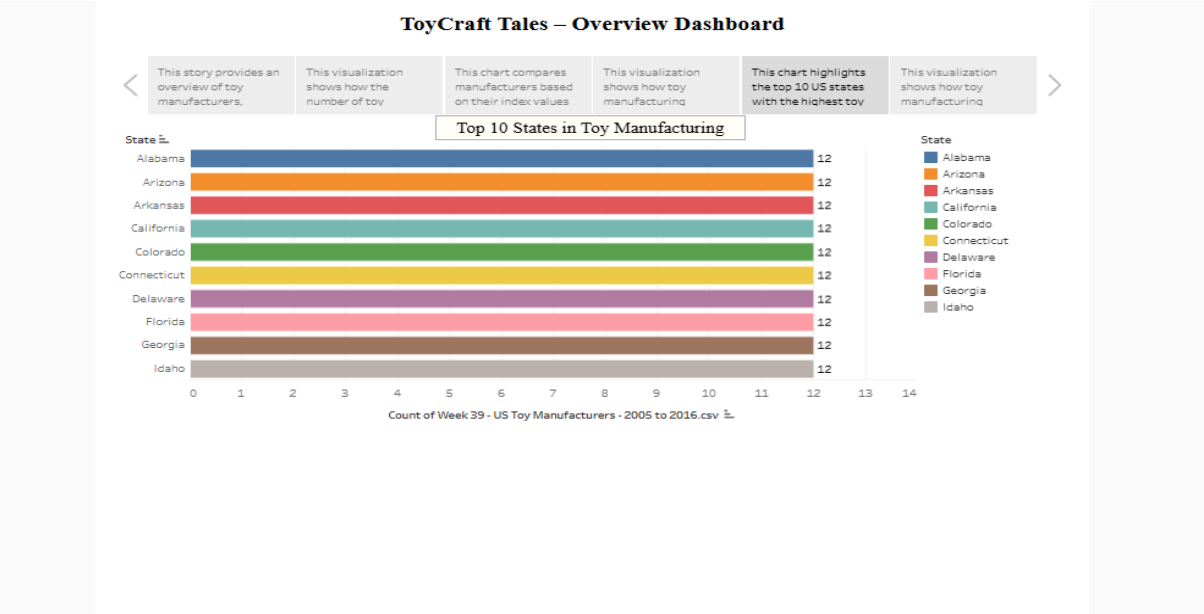
- Show percentage distribution across states.
- Understand contribution share.

Insight:
Certain states contribute major percentage of toy manufacturers.

## Dashboard Features

- Structured and clean layout
- Proper labeling of axes
- Comparative visual design
- Clear titles for each graph
- Professional formatting

## ToyCraft Tales – Story Explanation



### Story Overview

The Tableau Story presents the analysis in a structured, step-by-step format. Instead of showing all visualizations at once, the story divides the insights into logical sections for better understanding.

The story helps viewers understand the data flow clearly and makes the analysis more structured and professional.

### Story Structure

The story is divided into multiple story points covering:

- Top 10 States Analysis
- Year-wise Manufacturer Trend

- Index-based Manufacturer Comparison
- Overall Manufacturer Distribution
- Percentage Distribution by State

Each story point focuses on answering a specific business question.

### Story Features

The Tableau Story includes:

- Clear titles for each story point
- Sequential flow of analysis
- Business question-driven presentation
- Easy navigation between story points
- Clean and professional layout

The story format helps stakeholders understand the insights without confusion.

### Purpose of Story

The purpose of using a Story instead of only a dashboard is:

- To explain insights step-by-step
- To highlight key findings individually
- To make the presentation more structured
- To improve readability and understanding

## Conclusion

The Tableau Story effectively presents the toy manufacturing analysis in a logical sequence.

It enhances data storytelling by combining visualization with structured explanation, making the analysis more impactful and professional.
